

iAUTOTEC — Landing Page Content Brief

ATS | ADTC | STPMS

Prepared for: Content Management Team

Project: iAUTOTEC Main Landing Page | Pages: 4

Date: April 2026

Purpose	This brief outlines the complete section-by-section structure for the iAUTOTEC main landing page and three standalone solution pages (ATS, ADTC, STPMS). Each row marked 'To be written' requires content from the team before development begins.
Audience	B2B — Government transport departments, smart city authorities, municipal corporations, private testing center operators, and infrastructure developers looking to deploy AI-powered mobility solutions.
Tone	Authoritative, technology-forward, compliance-assured. Professional — not promotional. Emphasise AI, automation, and government alignment.
Primary CTA	Lead capture form (Name, Phone, Email, Organization, City, Message) + secondary WhatsApp / Call Now button.
Tech Setup	Main landing page + 3 standalone solution pages. Each solution page has its own URL and minimal layout with no main site navigation.
SEO Focus	Primary keyword: 'AI Vehicle Testing System India'. Separate landing pages for ATS, ADTC, and STPMS with targeted keywords per solution.

MAIN PAGE — iAUTOTEC Landing Page

AI Enabled Automation Solutions for Vehicle Testing, Driver Training & Smart Mobility

SECTION 01

Hero Banner

Field	Details
Background	Full-width hero image — AI/automotive/smart city visual
Badge text	AI-Powered Government Aligned Smart City Ready
Main Headline	AI Enabled Automation Solutions for Vehicle Testing, Driver Training & Smart Mobility
Sub Headline	1–2 lines. Angle: iAUTOTEC as India's leading AI-powered mobility automation partner for governments and operators
CTA Button 1	Explore Our Solutions — scrolls to solutions section
CTA Button 2	Request Demo — scrolls to lead form
CTA Button 3	Partner With Us — tel / WhatsApp link

Note: Headline should speak to government authorities and private operators — positioning iAUTOTEC as a strategic technology partner, not a vendor.

SECTION 02

About iAUTOTEC

Field	Details
Layout	Left: text content Right: facility / technology image
Label (small)	About iAUTOTEC
Heading	Leading Provider of AI-Enabled Automation Solutions
Body Copy	iAUTOTEC is a leading provider of AI-enabled automation solutions for the automotive and mobility sector, specialising in vehicle testing systems, driver training and testing centers, and smart traffic & parking management solutions. We help governments, transport authorities, and private operators transition from manual, inefficient systems to fully automated, data-driven, and compliant infrastructure.
Body Copy 2	With a strong focus on Artificial Intelligence (AI), IoT, and automation, iAUTOTEC delivers scalable solutions that improve road safety, operational efficiency, and revenue generation.
Trust Strip	Client / partner logos — images to be sourced by team

SECTION 03

Our Core Solutions

Field	Details
Section Heading	Our Expertise in Smart Mobility Solutions
Sub Heading	We design and implement end-to-end automation systems for:
Layout	3 large solution cards — full width, one per solution
Card 1	ATS — Automated Vehicle Testing Systems: AI-powered vehicle inspection lanes, fitness testing, VAHAN integration. CTA: Learn More about ATS
Card 2	ADTC — Accredited Driver Training & Testing Centers: AI-based driving simulators, automated test tracks, digital LMS, licensing authority integration. CTA: Learn More about ADTC
Card 3	STPMS — Smart Traffic & Parking Management Systems: Real-time parking tracking, AI-based traffic monitoring, IoT sensors, mobile app integration. CTA: Learn More about STPMS
Note	Each card links to its own standalone solution landing page

SECTION 04

Technology Stack

Field	Details
Section Heading	Technology Behind iAUTOTEC
Sub Heading	Our platforms are powered by cutting-edge technology
Layout	5 icon cards in a row
Card 1	Artificial Intelligence (AI) & Machine Learning
Card 2	Internet of Things (IoT)
Card 3	Computer Vision & ANPR Systems
Card 4	Cloud-Based Infrastructure
Card 5	Advanced Data Analytics & Reporting
Closing Line	Ensuring real-time monitoring, predictive insights, and scalable deployment

SECTION 05

Our Approach

Field	Details
Section Heading	Our Complete Lifecycle Approach
Sub Heading	From concept to commissioning — we own every phase
Layout	7 numbered process steps — horizontal timeline or numbered cards
Step 01	Project Consultation & Feasibility
Step 02	Customised Solution Design
Step 03	Infrastructure Development
Step 04	Hardware & Software Integration
Step 05	Testing & Commissioning
Step 06	Training & Deployment
Step 07	Ongoing Support & Maintenance

SECTION 06

Why Choose iAUTOTEC

Field	Details
Section Heading	Why Choose iAUTOTEC?
Layout	5–6 icon cards — 2 rows
Card 1	Leader in AI-based automotive automation solutions
Card 2	Expertise in government and smart city projects
Card 3	End-to-end execution — Design to Deployment
Card 4	Scalable and future-ready systems
Card 5	Focus on compliance, transparency, and efficiency
Closing Line	1 line — tone: confident, partnership-forward

SECTION 07

Industries We Serve

Field	Details
Section Heading	Industries We Serve
Layout	6 industry cards with icon + title
Card 1	Government Transport Departments
Card 2	Smart City Projects
Card 3	Municipal Corporations
Card 4	Private Testing Centers
Card 5	Driving Training Institutes
Card 6	Infrastructure Developers

SECTION 08

Vision & Mission

Field	Details
Section Heading	Our Vision & Mission
Layout	Two side-by-side highlighted boxes on light background
Vision Heading	Our Vision
Vision Content	To become a global leader in AI-powered mobility and automation solutions, enabling safer roads and smarter cities.
Mission Heading	Our Mission
Mission Content	To deliver innovative and scalable solutions that digitise and automate vehicle testing, driver training, and traffic management systems.

SECTION 09

Contact / Lead Capture Form

Field	Details
Section Heading	Get In Touch
Layout	Left: company contact info Right: enquiry form
Company Name	iAUTOTEC
Contact Details	Phone, Email, Corporate Office address — to be confirmed by team
Form Fields	Name / Phone Number / Email / Organisation / City / Message
Form CTA	Send Enquiry
Secondary CTAs	Request Demo Partner With Us Start Your ATS Center

PAGE 1 — Automated Vehicle Testing Systems (ATS)

Standalone landing page for the ATS solution — targeting government authorities & private operators

SECTION 01

Hero Banner

Field	Details
Background	Full-width ATS facility / inspection lane image
Badge text	AI-Powered Government Compliant VAHAN Integrated
Main Headline	To be written by content team
Sub Headline	1–2 lines. Angle: ATS as AI-powered vehicle inspection that eliminates manual errors and ensures compliance
CTA Button 1	Request Demo — scrolls to lead form
CTA Button 2	Start Your ATS Center — tel / WhatsApp link

Note: Headline should address government transport departments and private testing center operators. Position ATS as the automation solution that replaces corrupt, manual systems.

SECTION 02

What is ATS?

Field	Details
Layout	Left: ATS facility/lane image Right: text content
Label (small)	About ATS
Heading	Automated Vehicle Testing System (ATS)
Body Copy	The Automated Testing Solution (ATS) is an advanced system designed for automated vehicle inspection and fitness testing, ensuring compliance with transport regulations. AI-powered inspection lanes replace manual processes with transparent, data-driven evaluation.
Body Copy 2	2–3 additional paragraphs covering: integration with VAHAN and government databases, ANPR capabilities, real-time analytics — to be written by content team
Trust Strip	Logos of MORTH, VAHAN, relevant government bodies — images to be sourced

SECTION 03

Key Features

Field	Details
Section Heading	Key Features of Our ATS Solution
Layout	5 feature cards in a row with icon + title + short description
Feature 1	AI-Powered Vehicle Inspection Lanes — automated visual and mechanical inspection using computer vision
Feature 2	Automated Fitness Testing & Certification — digital certification with audit-ready reports
Feature 3	VAHAN & Government Database Integration — real-time data sync with national transport systems
Feature 4	Real-Time Analytics & Reporting Dashboard — live monitoring and performance insights
Feature 5	ANPR (Automatic Number Plate Recognition) — automated vehicle identification and tracking

SECTION 04

Services Covered

Field	Details
Section Heading	Testing Services Covered
Layout	5–6 service cards — 2 rows
Service 1	Brake Testing
Service 2	Suspension Analysis
Service 3	Emission Testing Integration
Service 4	Headlight Alignment
Service 5	Underbody Inspection
Note	Additional services can be listed based on actual scope — team to confirm full list

SECTION 05

Benefits

Field	Details
Section Heading	Why Automate with iAUTOTEC ATS?
Layout	4 benefit cards with icon + headline + 1-line description
Benefit 1	100% Transparent & Automated Testing — eliminates manual intervention and subjective evaluation
Benefit 2	Eliminates Manual Errors and Corruption — every test is recorded, timestamped, and audit-ready
Benefit 3	Faster Vehicle Processing Time — automated lanes process more vehicles with less waiting time
Benefit 4	Digital Records & Audit-Ready Reports — cloud-stored records accessible to regulatory bodies

SECTION 06

End-to-End Setup Support

Field	Details
Section Heading	Our End-to-End ATS Setup Support
Sub Heading	Complete turnkey solution — from concept to commissioning
Layout	6 numbered process cards — 2 rows × 3 columns
Step 01	Project Consultation & Feasibility — 2 bullet points needed
Step 02	Infrastructure Development — 2 bullet points needed
Step 03	Hardware & Software Integration — 2 bullet points needed
Step 04	Regulatory Approvals — 2 bullet points needed
Step 05	Testing & Commissioning — 2 bullet points needed
Step 06	Training, Deployment & Ongoing Support — 2 bullet points needed

Note: Content team to provide 2 bullet points per step describing what is included.

SECTION 07

Gallery

Field	Details
Section Heading	ATS Facility Gallery
Layout	Auto-scrolling image carousel
Images	ATS facility, AI inspection lanes, ANPR cameras, dashboard screenshots — team to source

SECTION 08

SEO & Keywords

Field	Details
Primary Keywords	Automated Vehicle Testing System, Vehicle Fitness Testing, ATS Center Setup, AI Vehicle Inspection
Secondary Keywords	Vehicle Inspection AI India, VAHAN Integrated Testing, Automated Fitness Certification
Schema Markup	Organization + Product/Service schema to be implemented by web team
Meta Title	To be written — include primary keyword
Meta Description	To be written — include primary keyword + CTA

SECTION 09

Contact / Lead Capture Form

Field	Details
Section Heading	Get In Touch — ATS Enquiry
Layout	Left: company contact info Right: enquiry form
Company Name	iAUTOTEC
Contact Details	Phone, Email, Corporate Office address — to be confirmed by team
Form Fields	Name / Phone Number / Email / Organisation / City / Message
Form CTA	Request ATS Demo
Secondary CTA	Start Your ATS Center

PAGE 2 — Accredited Driver Training & Testing Centers (ADTC)

Standalone landing page for the ADTC solution — targeting training center operators & government bodies

SECTION 01

Hero Banner

Field	Details
Background	Full-width ADTC facility / driving simulator / test track image
Badge text	AI-Powered Licensing Authority Integrated Standardised Training
Main Headline	To be written by content team
Sub Headline	1–2 lines. Angle: ADTC as AI-powered driver training infrastructure that improves road safety and standardises licensing
CTA Button 1	Request Demo — scrolls to lead form
CTA Button 2	Partner With Us — tel / WhatsApp link

Note: Avoid generic driving school language. Position ADTC as modern, AI-driven training infrastructure aligned with government licensing requirements.

SECTION 02

What is ADTC?

Field	Details
Layout	Left: simulator / test track image Right: text content
Label (small)	About ADTC
Heading	Accredited Driver Training & Testing Center (ADTC)
Body Copy	The ADTC solution enables the setup of modern driver training and testing centers with automated evaluation systems and digital learning tools. AI-based simulators, automated test tracks, and a digital LMS deliver standardised, unbiased driver assessment and certification.
Body Copy 2	2–3 additional paragraphs covering: integration with licensing authorities, training & testing modules, assessment automation — to be written by content team
Stat Strip	2–3 key numbers — e.g. road accident data, demand for licensed drivers, market size — team to source

SECTION 03

Key Features

Field	Details
Section Heading	Key Features of Our ADTC Solution
Layout	6 feature cards — 2 rows × 3 columns
Feature 1	AI-Based Driving Simulators — immersive simulation for safe, repeatable practice
Feature 2	Automated Driving Test Tracks — standardised assessment with no human bias
Feature 3	Digital Learning Management System (LMS) — theory training, progress tracking, digital records
Feature 4	Driver Performance Analytics — AI-scored driving behaviour and improvement insights
Feature 5	Integration with Licensing Authorities — direct data sync for faster certification
Feature 6	Automated Scoring & Certification — transparent, tamper-proof evaluation records

SECTION 04

Training & Testing Modules

Field	Details
Section Heading	Training & Testing Modules
Layout	4 module cards with icon + title + short description
Module 1	Theory-Based Digital Training — interactive digital curriculum aligned with licensing syllabus
Module 2	Simulator-Based Driving Practice — AI-monitored virtual driving sessions before on-road practice
Module 3	On-Road and Test Track Assessment — standardised real-world driving evaluation
Module 4	Automated Scoring & Certification — instant results, digital certificates, licensing authority reporting

SECTION 05

Benefits

Field	Details
Section Heading	Why Choose iAUTOTEC ADTC?
Layout	4 benefit cards with icon + headline + 1-line description
Benefit 1	Standardised Driver Training & Testing — consistent quality across all candidates and locations
Benefit 2	Improves Road Safety & Driving Skills — AI-driven feedback produces better, safer drivers
Benefit 3	Transparent & Unbiased Evaluation — automated scoring eliminates subjectivity and corruption
Benefit 4	Faster Licensing Process — automated assessment reduces processing time significantly

SECTION 06

End-to-End Setup Support

Field	Details
Section Heading	Our End-to-End ADTC Setup Support
Sub Heading	Complete turnkey solution — from concept to commissioning
Layout	6 numbered process cards — 2 rows × 3 columns
Step 01	Project Consultation & Feasibility — 2 bullet points needed
Step 02	Infrastructure Development — 2 bullet points needed
Step 03	Equipment Procurement & Installation — 2 bullet points needed
Step 04	Compliance & Accreditation Support — 2 bullet points needed
Step 05	Curriculum Development & Instructor Training — 2 bullet points needed
Step 06	Operational Setup, Deployment & Ongoing Support — 2 bullet points needed

Note: Content team to provide 2 bullet points per step describing what is included.

SECTION 07

Gallery

Field	Details
Section Heading	ADTC Facility Gallery
Layout	Auto-scrolling image carousel
Images	Driving simulators, test tracks, training classrooms, digital LMS interface — team to source

SECTION 08

SEO & Keywords

Field	Details
Primary Keywords	Driver Training Center Setup, Automated Driving Test Track, ADTC India, Driving Simulator Training
Secondary Keywords	AI Driver Training India, Accredited Driving Center, Digital LMS Driving, Licensing Authority Integration
Schema Markup	Organization + Product/Service schema to be implemented by web team
Meta Title	To be written — include primary keyword
Meta Description	To be written — include primary keyword + CTA

SECTION 09

Contact / Lead Capture Form

Field	Details
Section Heading	Get In Touch — ADTC Enquiry
Layout	Left: company contact info Right: enquiry form
Company Name	iAUTOTEC
Contact Details	Phone, Email, Corporate Office address — to be confirmed by team
Form Fields	Name / Phone Number / Email / Organisation / City / Message
Form CTA	Request ADTC Demo
Secondary CTA	Partner With Us

PAGE 3 — Smart Traffic & Parking Management Systems (STPMS)

Standalone landing page for STPMS — targeting smart city authorities & urban operators

SECTION 01

Hero Banner

Field	Details
Background	Full-width smart city / traffic / parking facility image
Badge text	AI-Powered IoT-Enabled Smart City Ready
Main Headline	To be written by content team
Sub Headline	1–2 lines. Angle: STPMS as AI-driven infrastructure that reduces congestion, maximises parking revenue, and improves urban mobility
CTA Button 1	Request Demo — scrolls to lead form
CTA Button 2	Partner With Us — tel / WhatsApp link

Note: Target audience is smart city project managers, municipal corporations, and private parking operators. Lead with efficiency, revenue, and user experience gains.

SECTION 02

What is STPMS?

Field	Details
Layout	Left: smart parking / traffic control image Right: text content
Label (small)	About STPMS
Heading	Smart Traffic & Parking Management System (STPMS)
Body Copy	The STPMS solution is designed for smart cities and urban infrastructure, enabling efficient traffic flow and intelligent parking management. Real-time IoT sensors, AI-based traffic monitoring, and integrated mobile applications transform how cities manage movement and parking.
Body Copy 2	2–3 additional paragraphs covering: command & control dashboard, ANPR integration, digital payment system, mobile app — to be written by content team
Stat Strip	2–3 key numbers — e.g. traffic congestion costs, parking revenue opportunity, smart city adoption stats — team to source

SECTION 03

Key Features

Field	Details
Section Heading	Key Features of Our STPMS Solution
Layout	6 feature cards — 2 rows × 3 columns
Feature 1	Real-Time Parking Availability Tracking — live sensor data shows available spaces instantly
Feature 2	Smart Parking Allocation System — automated guidance directs drivers to nearest available space
Feature 3	AI-Based Traffic Monitoring — intelligent analysis of traffic patterns for adaptive signal control
Feature 4	Integrated Mobile App & Dashboards — user-facing app + operator command center
Feature 5	Digital Payment Integration — cashless payments for parking via app or kiosk
Feature 6	ANPR Cameras — automated vehicle identification for enforcement and billing

SECTION 04

System Components

Field	Details
Section Heading	System Components
Layout	4 component cards with icon + title + short description
Component 1	IoT-Based Parking Sensors — ground-level sensors that detect vehicle presence and transmit real-time availability data
Component 2	ANPR Cameras — number plate recognition for automated entry, exit, and enforcement
Component 3	Command & Control Dashboard — centralised operator interface for monitoring and management
Component 4	User Mobile Application — real-time parking discovery, navigation, payment, and booking for end users

SECTION 05

Benefits

Field	Details
Section Heading	Why Choose iAUTOTEC STPMS?
Layout	4 benefit cards with icon + headline + 1-line description
Benefit 1	Reduces Traffic Congestion — real-time guidance eliminates parking-search traffic in urban areas
Benefit 2	Maximises Parking Utilisation — smart allocation ensures near-100% occupancy efficiency
Benefit 3	Improves User Experience — seamless app-based discovery, navigation, and payment
Benefit 4	Increases Revenue for Operators — digital enforcement and dynamic pricing drive higher yield

SECTION 06

End-to-End Setup Support

Field	Details
Section Heading	Our End-to-End STPMS Setup Support
Sub Heading	Complete turnkey solution — from feasibility to live deployment
Layout	6 numbered process cards — 2 rows × 3 columns
Step 01	Site Survey & Feasibility Study — 2 bullet points needed
Step 02	System Design & Architecture — 2 bullet points needed
Step 03	IoT Hardware Installation — 2 bullet points needed
Step 04	Software Integration & Dashboard Setup — 2 bullet points needed
Step 05	Testing, Commissioning & Go-Live — 2 bullet points needed
Step 06	Training, Handover & Ongoing Support — 2 bullet points needed

Note: Content team to provide 2 bullet points per step describing what is included.

SECTION 07

Gallery

Field	Details
Section Heading	STPMS Deployment Gallery
Layout	Auto-scrolling image carousel
Images	Smart parking facilities, IoT sensors, ANPR cameras, dashboard interface, mobile app — team to source

SECTION 08

SEO & Keywords

Field	Details
Primary Keywords	Smart Parking System, Traffic Management System, IoT Parking Solution, Smart City Parking India
Secondary Keywords	AI Traffic Control India, Real-Time Parking Tracking, ANPR Parking System, Urban Mobility Solution
Schema Markup	Organization + Product/Service schema to be implemented by web team
Meta Title	To be written — include primary keyword
Meta Description	To be written — include primary keyword + CTA

SECTION 09

Contact / Lead Capture Form

Field	Details
Section Heading	Get In Touch — STPMS Enquiry
Layout	Left: company contact info Right: enquiry form
Company Name	iAUTOTEC
Contact Details	Phone, Email, Corporate Office address — to be confirmed by team
Form Fields	Name / Phone Number / Email / Organisation / City / Message
Form CTA	Request STPMS Demo
Secondary CTA	Partner With Us
